PROFILE SUMMARY

Senior React JS Developer and Project Lead with **10+ years of experience** building scalable, high-performance web applications across fintech, banking, insurance, government, and e-learning domains. Proficient in **React JS, Redux, TypeScript, Node.js, and MERN Stack**. Hands-on expertise in **Playwright end-to-end test automation**, Page Object Models (POM), and reusable **snapshot testing framework libraries** for visual regression testing. Experienced in leveraging **AI tools (Cursor, Claude)** to accelerate development and improve productivity. Delivered WCAG-compliant, production-ready UIs for global clients including **Intuit, Microsoft, HSBC, Prudential, Credit Suisse, and Woolworths**.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, ES6, TypeScript, SASS, LESS

State Management: Context API, Redux-Thunk, React Hooks

Unit Testing: Jest, Enzyme, React Testing Library

Backend: Node JS, Express JS, MongoDB, REST APIs

AI Tools: Cursor, Claude (Anthropic), GitHub Copilot

Bundlers: Webpack, Vite, Babel, Grunt, Gulp

Frameworks: React JS, Next JS, Redux, Redux-Toolkit, Redux-Saga

Automation Testing: Playwright, Selenium, Puppeteer, Cypress

Snapshot Testing: Visual Regression, Snapshot Framework Library

UI Libraries: Material UI, Bootstrap, Styled Components

Tools: Figma, Postman, Git, GitHub, Bitbucket, GitLab

CI/CD & Auth: Pipeline Integration, JWT Token

PROFESSIONAL EXPERIENCE

Persistent Systems

Jan 2025 – Till Date

Project Lead

Project Lead Responsibilities

- Led and mentored a cross-functional team of front-end and full-stack developers, ensuring code quality through regular code reviews and best practice enforcement.
- Collaborated with product managers, designers, and stakeholders to define technical requirements, sprint goals, and delivery timelines in an Agile/Scrum environment.
- Conducted sprint planning, mid-sprint reviews, and end-of-sprint retrospectives and demo sessions to ensure on-time delivery.
- Prepared and presented weekly status reports to stakeholders covering progress, risks, blockers, and upcoming milestones.
- Responsible for technical decision-making, architecture design, and technology selection for project modules.
- Coordinated with QA, DevOps, and backend teams to ensure seamless integration and deployment across environments.
- Managed task allocation, tracked progress, and resolved blockers to maintain smooth project execution.
- Leveraged AI-powered development tools including **Cursor** and **Claude (Anthropic)** to accelerate code generation, debugging, code reviews, and documentation, improving overall team productivity.

Client 1: Microsoft — NYC OTI My City

Public-facing government application — mono repo containing back-end, front-end, configuration, pipelines, Dataverse, and documentation assets.

- Developed and managed UI web pages and internal layouts using ReactJS, Context API, Redux, and React Hooks.
- Created responsive front-end UI design standards including wireframes, UI mockups, detailed visual designs, and site maps using Figma, Material UI, and styled components.
- Delivered a fully WCAG-compliant product adhering to Accessibility standards.

Skills: HTML5, CSS3, TypeScript, React JS, Jest, React Testing Library, Material UI, Figma

Client 2: Intuit — TurboTax & QBO ICC Credit Card

- Designed and implemented **Playwright end-to-end automation test scenarios** for TurboTax web pages covering login, income entry, deductions, and tax review/submission flows.
- Developed reusable **Page Object Models (POM)** to maintain a clean, scalable, and maintainable test architecture.
- Automated end-to-end flows for ICC Credit Card — Onboarding (registration, KYC, card activation), Transactions (view, filter, search, export), Profile Management, and Teams (roles & permissions).
- Built a reusable **snapshot testing framework library** for visual regression testing across TurboTax and QBO products.
- Implemented baseline snapshot management, pixel diff thresholds, and automated snapshot update strategies.

- Integrated snapshot library into the **CI/CD pipeline** to detect unintended UI changes early.

Skills: Playwright, JavaScript, TypeScript, React JS, POM, Snapshot Testing, Visual Regression, CI/CD

Tachyon Tech

Jul 2024 – Nov 2024

Senior Software Engineer

Client: Woolworths — Woolies

Developed a product detail web page for a glossary website.

- Created React components for product details, cart, pricing, and promotions.
- Implemented unit tests using Jest and React Testing Library.
- Applied Sass and media queries to ensure responsive design across all devices.

Skills: HTML5, CSS3, TypeScript, React JS, Jest, Storybook, Sass, Node JS, Next JS

HSBC Technology India

Feb 2023 – Dec 2023

Consultant Specialist

Project: CCAT (Client Custody Asset) – HSBC

Core custody services in investment operations for mutual fund client solutions.

- Designed components for user authentication and Meta Manager; built a global UI library with search, sort, and filter functionalities.
- Integrated React with Redux for efficient state management and CRUD operations.
- Created MongoDB schemas and designed RESTful API endpoints using Node.js and Express.

Skills: TypeScript, React JS, Redux, Node JS, Express, MongoDB, Jest, Next JS

Capgemini

Oct 2021 – Jan 2023

Consultant Specialist

Project: OPOE – Prudential Insurance

Online portal for financial consultants to accelerate the policy sales process.

- Developed a global UI library with form-based elements and table components with search, sort, and filter.
- Integrated React with Redux for state management and designed RESTful APIs using Node.js and Express.

Skills: JavaScript, React JS, Redux, Node JS, Express, MongoDB, AWS, ZoomSDK

IDC Technology

Oct 2020 – Oct 2021

Senior Software Engineer

Project: Goals Driven Wealth Management – Credit Suisse

Portal to analyze customer goals and maximize wealth through insurance, cash flow, and retirement planning.

- Built modular React components including forms, dropdowns, tabs, accordions, and tables with search/sort/filter.
- Integrated React with Redux store for seamless data flow and CRUD operations.

Skills: JavaScript, React JS, Redux, Node JS, Express, MongoDB, Jest, Azure

MITR Learning Media

Jan 2017 – Jun 2020

Senior Software Engineer

Project: I-Fabric, I-Ready – Curriculum Associates 🏆 **2x Spot Award**

eLearning solutions for Grade K-5 covering Math, Bio, and Reading subjects.

- Led development of React components for product modules, renderers, widgets, and utilities; conducted code reviews and refactoring.
- Implemented end-to-end testing using Selenium, BrowserStack, and Nightwatch.
- Contributed to open-source createjs-accessibility repository for accessibility management.

Skills: JavaScript, React JS, Redux, Node JS, Selenium, CreateJS, TimelineMax JS, PWA

Hurix Digital

Dec 2015 – Dec 2016

HTML5 Programmer

Project: GEMS, HMH NGSS CDLO 🏆 **Team of the Month**

eLearning solutions for Grade K-5 covering Math, Physics, and Chemistry.

- Implemented animations using TweenMax and built D3.js chart components (bar, pie, line).
- Designed interactive quiz templates including drag-and-drop, fill-in-the-blank, and matching pair activities.

Skills: HTML5, CSS3, JavaScript, D3.js, CreateJS, TweenMax

Tata Interactive System

Oct 2012 – Jan 2014

Software Engineer

Project: WBT Courses – Excelsior & Western New York University

eLearning for Criminal Justice Law and Network Security courses.

- Converted Flash/PSD designs to HTML5 for improved compatibility and performance.
- Created interactive templates including MCQs, drag-and-drop, timelines, and audio/video integration.

Skills: HTML5, CSS3, JavaScript
