

FROM

**FRONTEND
DEVELOPER**

TO

**FULL STACK
DEVELOPER**

A practical roadmap
for **modern developers**.

STEP 1

MASTER THE FRONTEND FUNDAMENTALS

Before frameworks, libraries, or tools — master the basics that **power the web**.

HTML

CSS

JavaScript

Learn how the web
really works.

STEP 3

BUILD WITH REACT

Build interactive, fast
and scalable **user interfaces**.

Components

Build reusable UI blocks.

State Management

Manage data and UI state
efficiently.

Hooks

Use React Hooks to write
clean and powerful logic.

API Integration

Connect your UI with
real-world data.

Think in **components**.
Build once, use anywhere.

```
import React from 'react';

function Button() {
  return (
    <button className="btn">
      Click me
    </button>
  );
}

export default Button;
```

LEVEL UP WITH TYPESCRIPT

Add superpowers to your JavaScript with [static typing](#).

SAFER CODE

Catch errors early and write reliable applications.

CLEANER CODE

Better structure, autocomplete, and refactoring.

EASIER TO MAINTAIN

Scale your projects with confidence as they grow.

TypeScript today,
fewer bugs tomorrow.

```
user.ts
1 interface User {
2   id: number;
3   name: string;
4   email: string;
5   isActive: boolean;
6 }
7
8 function getUser(id: number): User {
9   // logic here
10  return { id, name: "Javeria", email:
11    "j@dev.com", isActive: true };
12 }
```

LEARN NEXT.JS

Modern frontend
means **better web apps**.

SERVER RENDERING

Faster initial loads and
better performance.

ROUTING

File-based routing
that just works.

PERFORMANCE

Built-in optimizations
for speed.

SEO FRIENDLY

Better visibility and
discoverability.

Build **production-ready**
apps with confidence.

UNDERSTAND THE BACKEND

Go beyond the UI.
Learn how applications work
behind the scenes.

PYTHON

A powerful and beginner-friendly backend language.

FLASK

Lightweight framework for building APIs fast.

REST APIs

Design and build APIs that power applications.

AUTHENTICATION

Secure login, registration and protected routes.

DATABASES

Store, organize and retrieve data efficiently.

Don't just consume APIs.
Learn how they're built.

FRONTEND

BACKEND

```
1 from flask import Flask, request, jsonify
2
3 app = Flask(__name__)
4
5 @app.route('/api/data', methods=['GET'])
6 def get_data():
7     data = {"success": True, "message": "Hello!"}
8     return jsonify(data)
9
10 if __name__ == '__main__':
11     app.run(debug=True)
```

DATABASE

PostgreSQL / MySQL

MASTER DATABASES

Strong applications are built on **solid data**.

```
SELECT u.id, u.name, o.status
FROM   users u
JOIN   orders o ON u.id = o.user_id
WHERE  o.status = 'completed'
ORDER BY o.created_at DESC;
```

POSTGRESQL

Powerful, reliable and production ready.

FIREBASE

Real-time database for modern apps.

DATA MODELING

Design the right structure for your application.

QUERIES

Write efficient queries and optimize performance.

RELATIONSHIPS

Connect tables and build meaningful relationships.

Great developers understand data. **Master it, own it.**

Secure

Scalable

Consistent

Reliable

STEP 7

BUILD PRODUCTION SKILLS

Go from code that works
to **systems that scale**.

GIT

Version control, branching,
and clean collaboration.

DOCKER

Containerize your apps
for consistency.

TESTING

Write tests. Ship better,
bug-free code.

CI/CD

Automate build, test
and deployment.

CODE REVIEWS

Review, refactor and
raise code quality.

These skills turn good
developers into **great ones**.

THE PRODUCTION PIPELINE

CODE

Write clean,
maintainable code.

COMMIT

Push changes
to repository.

BUILD

Automated build
triggers.

TEST

Run automated
tests.

DEPLOY

Deploy to staging /
production.

MONITOR

Monitor, log and
improve.

NEXT >>

KEEP LEARNING

The best developers
never stop evolving.

AI & AUTOMATION

Use AI tools to boost productivity and creativity.

CLOUD

Deploy, scale and manage apps in the cloud.

SYSTEM DESIGN

Design scalable, reliable and efficient systems.

ARCHITECTURE

Make better technical choices. Build for the long run.

Stay curious.
Stay consistent.
Keep growing.

ADAPT

Technology changes.
Adapt fast.

LEARN

New tools. New ideas.
New possibilities.

BUILD

Apply knowledge.
Build real things.

IMPACT

Solve problems.
Create impact.

GROW BEYOND THE ROADMAP

Explore new technologies,
frameworks and best practices.

Share your journey, projects
and knowledge with others.

Open source, help others,
and be part of the community.

Solve real-world problems.
It makes you 10x better.

Dream big. Plan. Execute.
Repeat.

Small daily progress leads to massive results.

A person is seen from behind, sitting at a desk and coding on a computer. The background features a city skyline at night and a glowing, winding path leading up a mountain to a flag at the peak. The person's hoodie has the text "const future = 'limitless';" on it. A mug with a code symbol is on the desk.
